

**Wayne Cheng**  
**2019 – 2020 Scarborough Sharks Midget B**

**Introduction**

Wayne has been involved in minor hockey in the GTHL, OMHA and LLFHL for over 12 years. He has held the positions of Coach, Manager and Trainer within these various teams and is well-versed on how to effectively guide a hockey team. Wayne is most proud of the 6 years that he has coached in the Scarborough Sharks organization and is grateful for the opportunity to lead a group of young ladies for the 2019 – 2020 season. He is very family-oriented as he understands that hockey is also a complete family experience. He will bring a strong sense of family, camaraderie and togetherness to the dressing room as well.

**Program Overview**

The success of the program does not solely depend on wins and losses but it is also attributed to how much each player learns throughout the season. Wayne will cultivate an environment of open communication and learning where each player will be challenged to view and think the game differently. He will teach various in-game tactics, systems and specialty team play to enhance the learning experience. He also believes the game of hockey teaches many valuable life skills that can be utilized throughout one's life. Characteristics such as hard work, integrity, accountability, commitment and respect will be mentored and expected.

**Player Development**

The player development plan will consist of the following:

- Off-season fitness and skills challenges.
- Pre-season training camp.
- 2 practices per week during the season where 1 practice will focus on technical skills and skating development while the other practice will focus on team play (systems, tactics and specialty teams).
- Participation in 3 to 4 tournaments where one will be an out-of-town tournament.

**Summary**

Wayne will seek to cultivate a safe and positive environment where hockey will be the vehicle to enhance a variety of foundational life skills and lessons. A strong work ethic will be expected at all practices and games because as each player improves, their contributions will help the team meet its objectives.
